### Nestosil Dry Bounce

---

Macro Silicone  
Emulsion

---

Provides remarkable dry and crispy feel along with softness

---

**Nestosil Dry Bounce** is specially modified polymeric resin emulsion . It gives remarkable dry and crispy feel along with softness to all kinds of treated fabrics.

#### PROPERTIES :

Physical Appearance	: Milky white emulsion
Ionic Nature	: Non-ionic.
Compatibility	: Compatible with cationics and anionics.
Solubility	: Miscible in water in all proportions.
pH of 5% soln.	: 6 to 7.

#### APPLICATION :

**Nestosil Dry Bounce** can be applied by pad-dry-cure method.

Dosages are 5 gpl to 15 gpl depending on the fabric quality and the desired properties.

pH of the padding liquor – between 6 to 7.

Dry and then cure at 160°C to 180°C for 45 sec. to 1 min.

#### ATTRIBUTES :

- 1) Gives very good dry and crispy feel along with full hand to the treated fabric
- 2) Durable to wash.
- 3) Improves elasticity, resilience of the fabric.
- 4) Improves crease resistance, drape, tensile strength, abrasion resistance, cut and sew properties of the treated fabric.
- 5) Non yellowing on white goods, even after prolonged period.

**The product appearance varies from batch to batch. The colour & viscosity may vary from batch to batch and its intensity is not an indication of product strength.**

NONWARRANTY: The suggestions and data in this bulletin are based on information we believe to be reliable. They are offered in good faith but without guarantee, as conditions and methods of use of our products are beyond our control. We recommend that the prospective user determine the suitability of our materials and suggestions on an experimental basis before adopting them on a commercial scale.
