#### **Deep Shade S20R**

**Blooming Agent** 

**Deep Shade S20R** is the highly concentrated special reactant type finishing agent which imparts excellent bright & deep colour effect for fabric.

#### Uses

**Deep Shade S20R** gives excellent deep brighter / redder colour effect especially for deep shades. It can be used on all types of fibres and their blends. It shows minimum effect on handle, shade and light fastness. It does not affect Sewability of PES.

Feature	Benefits
Excellent colour deepening effect	<ul> <li>It gives a very dark colour effect to deep shades like black and make it jet black</li> </ul>
<ul> <li>Universal applications</li> </ul>	<ul> <li>It can be applied on cotton, polyester and its blends</li> </ul>
No effects on fasteners properties	<ul> <li>It does not have any adverse effect on fastness properties of fabrics</li> </ul>
Special acryl resin-based formulation	It is much better in performance as compared to silicone-based products without any negative impact on fabric properties

### **Application**

The optimum dosage depends upon type of fabric, construction, weight, required performance and procedure. It is recommended to use **Deep Shade S20R** as below

- 1. Padding **Deep Shade S20R** 2 ~ 3% soln. (at room temperature)
- 2. pH range of finishing bath is adjusted at 4.0~5.0. In case of using together with another finishing agent, the enough pre-test must be performed.
- 3. Squeezing Squeezing is necessary, because of preventing from unlevel adsorption.
- 4. Curing 140°C for 1~2 min

## **Properties**

Chemical Constitution	Acryl Based Resin Emulsion
Physical form	White emulsion
pH (aqueous solution)	6.5 ± 0.5
Specific gravity at 20° C	Approx. 1.00 g/cm3
Solubility	Readily dispersible in water
Storage Stability	<b>Deep Shade S20R</b> is stable for 1 year, when properly stored in closed containers at 20°C.
Ecology/Toxicology	The usual hygiene and safety rules for handling chemicals should be observed in storage and use. The product must not be swallowed.
